This provocative and inspiring book raises questions like these and explores them with the champions, among them Jackie Joyner-Kersey; race-car driver Lyn

St. James; Julie Croteau, first woman college baseball player; dog-sled racer Susan Butcher; an unnamed lesbian golf champion; and more. The author has also talked to scores of women who are not professionals but who love sports. Women's athletics are at a crossroads. More women play or watch sports than ever before in American history. Millions of women swim, run, and do aerobics regularly): There's a burgeoning growth in the number of women who play golf and volleyball. In professional sports, the change is even more striking. There are huge purses for women's professional tennis and golf, and eight other sports have professional leagues for women.
