The Statesman s Year-Book made its first appearance in the year when, in" America, Lincoln was elected President of the Union for the second time, when

Jefferson Davis was President of the Confederate States and Archduke Maximilian was precariously perched on the Mexican throne. In Britain Palmerston was presiding over his second ministry and income tax was ninepence in the pound. Now in its 125th year this essential book of reference is still unrivalled. It contains facts and figures of the countries of the world from Afghanistan to Zimbabwe normally only available in dozens of separate volumes, with data obtained from official and unofficial sources. John Paxton, who joined the publication in 1963, the centenary year, and became editor in 1969, is in constant touch with the affairs of every country, and provides extensive data from official semi-official and private sources. He is editor of The Statesman's Year-Book Historical Companion. He also compiled The Statesman's Year-Book World Gazetteer, now in its third edition, and has written many books on European affairs including A Dictionary of the European Communities.
