in more than 60 countries and accessed by more than 15,000 additional readers online. The book is currently translated into Portuguese, Russian, and Chinese. Translations into Vietnamese is pending. This edition includes 132 tables and more than 300 references to publications or presentations in 2002, reflecting the authors' efforts to keep abreast of new developments by attendance at major scientific

conferences and by systematic review of 42 relevant journals.
Recommendations presented here are largely based on federal
guidelines: Antiretroviral therapy for adults, pregnancy management,
opportunistic infection prophylaxis, management of occupational
exposure, management of TB CO—infection, management of HCV CO—
Infection, and management of sexually transmitted diseases. The
authors have provided recommendations based on available data and
personal experience/opinion when no federal guidelines exist.
