Creativity means originality, expressiveness and imagination.

Sergers give us decorative possibilities that open a whole new world of creativity for the home sewer.., a creativity that looks sophisticated, not cutesy!

A serger trims, then totally encases, an edge of fabric- unlike the zigzag on a conventional sewing machine. Also, since the stitches are formed over a metal stitch finger, the edge will never draw up, even on lightweight silkies. Because sergers have "loopers" that go over and under the fabric, heavy decorative threads, yarns, and ribbons can be used. These cannot be used on conventional machines because they will neither fit through the needle nor penetrate many fabrics.
