From Library Journal Since his election in 1978, Pope John Paul II has worked tirelessly to bring the Roman Catholic Church into dialog with contemporary culture and religion. In addition, he has sought to renew the spirituality of Catholicism through his writings and speeches. Bunson, the author of numerous encyclopedias, has collected in one place selections from the pope's encyclicals, plays, public addresses, and papal letters that provide the pope's insights into topics ranging from death and the afterlife to world religions. On humanity: "[Man is a] pilgrim all his life, a pilgrim of the Absolute, traveling towards a goal, seeking the face of God." On women: "Women have the task of assuring the moral dimension of culture." Given the

pope's popularity and the controversy his words often generate, Bunson's book will be a worthy addition to most collections.Copyright 1995 Reed Business Information, Inc.
