Amazon.com Ted Rall is pissed off. He has issues. He will never succeed with such a bad attitude--or maybe he already has. Revenge of the Latchkey Kids distills Rall's vast torrent of negative emotions into a passionate litany of what's screwed up in America today. If you're a Gen-Xer who suffered through the parental experiments of the 1970s, or ever slaved for meager pay and no benefits as a temp, or wondered when you'd ever pay off your student loans, Rall will hit a nerve. And then hit it again. And keep hitting it. It would be simple to dismiss Rall as a whiner if he weren't so right all the time. Furthermore, at the risk of sounding like one of his cartoons, Rall performs

a vital social function: he presents a point of view other than that of the demographic 800-pound gorilla, the baby boomer. Rall has no pity for that generation, which he sees as self-indulgent, hypocritical, and well, evil. But the cartoonist is an evenhanded demonizer: Gen-X fares little better; it's clear Rall has no illusions as to what nightmares would ensue if he and his compatriots ran things. Revenge of the Latchkey Kids is a howl of anger--in perfect pitch. Ted Rall serves up an opinion you won't get anywhere else. Get some before he gives up. Entertainment Weekly, L.S. Klepp The sporadically funny result plants well-aimed kicks on deserving corporate and baby-boomer behinds. But in the end, his seething social observations resolve themselves into a one-note whine.
