The purpose of this anthology is to deepen Western understanding of the source substance and significance of contemporary Soviet foreign policy. Our book is designed for students of Soviet politics, comparative foreign policies and international relations. Also it is structured to meet the needs of government, business and media officials and of citizens concerned about the USSR's international aims, activities and accomplishments. The present work complements our anthology on Soviet domestic politics, *The Soviet Politburo in the Modern Era* (Hawthorne, NY: Aldine Publishing Co, 1984). Together, these volumes provide a comprehensive survey of notable Western writings about Soviet external and internal behavior and their interrelationships. Competing viewpoints are juxtaposed primarily in the first and last parts of both books, and authoritative analyses of key topics are presented primarily in the other parts. A distinctive feature of this collection is its numerous contributions from present and past officials of the United States Government and from fulltime researchers in organizations that advise government officials. These contributions provide some of the most insightful and knowledgeable interpretations of Soviet foreign policy. Also, they reflect the concerns of Americans inside and outside of government who participate in public debate about international politics. We hope to raise the level of this debate by stimulating informed and independent-minded analysis of Soviet international activities and of their policy implications for the West. In a word, the present anthology is of policy relevance as well as of academic and general interest. It is written for Western policymakers and their advisors as well as for the university community and the inquisitive public. Almost all our authors are American, and the others are European or Canadian. We intend to supplement, not supplant, the preeminent histories of Soviet international behavior--Adam B. Ulam, *The Expansion and Coexistence*
