How to use this book
The more than 600 symptoms included in this book cover practically the entire spectrum of disease in man. Part 1: Symptoms tile various indications of illness are grouped according to the part of the body affected and alphabetized within each group. (The section "Symptoms Affecting the Whole Body" lists those symptoms that cannot be associated with any specific part of the body such as weakness or weight loss.) The diseases indicated by a particular symptom are listed below each symptoms category. Each disease is identified by a reference number: to know more about a particular ailment refer to Part 2: Diseases and locate the disease by its reference number; the reference numbers are consecutive and key numbers can be found in the upper right-hand corner of each page in Part 2. Every disease is reviewed emphasizing all the pertinent facts. Such questions are answered as follows: Is it serious? Can this disorder be regarded with indifference; neglect or should a physician be seen at once? Every vital question about the disease is revealed and keynoted. The advice given represents the best thinking of some of the best medical minds in the country.

Step 1: Let us say the symptom is swollen leg; you will find it in the Table of Symptoms beginning on page 3 under "Symptoms of Bones Joints Muscles and Extremities swollen leg." Turn to the appropriate page (199) in Part I and identify the ailment Phlebitis 141 under the Swollen Leg heading. Note the reference number 141 that follows the disease name. Stop. Part I to Part 2: Diseases. You can easily find the reference number. Remember: Step 1 is the page number; Step 2 is the reference number.
