INTRODUCTION
The purpose of this book is to enable students of psychopathology to
acquire knowledge and skills in:
the systematic observation of patient behavior
the effective use of the mental status examination
the correct application of psychiatric terminology to patients
the recognition and classification of major syndromes of psychopathology
Each chapter contains information basic to the evaluation of patients with psychological problems. Commonly used psychiatric terms are defined and the major psychiatric syndromes are phenomenologically described in detail. The reader is systematically taught to accurately identify, describe and classify pertinent patient behaviors and match these findings with established psychopathologic syndromes. The book is designed to be used
