Amazon.com Paul B. Farrell, a former investment banker and journalist who currently broadcasts on the Web, believes cyberspace is dramatically changing the world of finance. In Expert Investing on the Net, he explains how to prepare for online investing and then navigate among today's top commercial products and services. A final section examines and evaluates such issues as quote and market-data vendors,

online banking, and telecommunications, in regard to their potential impact on financial markets. Book Description For today's new breed of investor—tough-minded, analytical, and online—Expert Investing on the Net is a key resource. A sound overview of the Top-25 Net-based financial packages, it's infused with tips and insights. —Paul A. Gilster, author of The New Internet Navigator See all Editorial Reviews
