Global warming means that our coastlines change and areas of the world disappear; it means that habitats vanish, ecosystems are unbalanced, climate zones shift, and that animal and plant life disappear. The photographs in this book illustrate the wealth that is at stake. Unforgettable images reveal the unexpected, exhilarating beauty of the world's carefully balanced ecosystems, and the people whose traditional way of life is

in tune with nature.

看到封面就走不动了，以后一定要去Bora Bora

非常精彩。美中不足是设计上面还是有失精细。
