This inspirational interiors book, the first in the series "New Country Style", redefines English country style for a growing international, design-savvy audience. A creative new generation of city-dwellers is seeking the country life, whether in the rolling hills of the Cotswolds, the Devon moorland or the Norfolk broads. Snapping up cottages, sprucing up inherited properties, reinterpreting vernacular buildings, this new wave of country people are injecting funkiness and bright ideas into their stylish individual places and spaces.
