"Kingfisher Knowledge" is a groundbreaking series for readers hungry for information on today's hot topics. Lively, engaging text, packed with information, accompanies stunning photographs that enhance each chapter. Amazing, state-of-the-art digital

artwork guides readers into the fascinating heart of the subject. This learning adventure does not stop there - information panels throughout lead the reader to further discovery. Each chapter offers website links, book lists, places to visit and career information. "Natural Disasters" details the most catastrophic natural events that have shocked the world since history began. These are events that people have no control over - the sheer power of monster waves, booming avalanches, ground-shattering earthquakes, unstoppable floods, terrifying tornadoes and raging bushfires. Discover how rescue teams operate, and how experts try to predict and prevent disaster.
