tun. After all it's your baby. Why not enjoy it? What's In a Name? Adam and Eve didn't hang about when it came to going and multiplying. Once they'd got the knack it wasn't long before they were multiplying. Thanks to their indecent enthusiasm for the job there are more people alive today than have died in the whole history of the human race. Small wonder that parents seek original names to give their children some individuality in the global village that has become our home. There's not much room at the moment so if we can crown our babies with early distinction it's all the better. In some cultures children are not considered born until they have been named. Britain's system of birth registration is a bureaucratic form of the same belief. Society is a club and a name is the entrance fee exacted for membership. Once you've got a name you're in for life.
