Book Description In spite of the widespread recent attention to the immune system, many people don't understand what it is and how it works -- or doesn't work. The confusion ends with this in-depth look at the basic function of the immune system, how it can break down, and how to "power it up" against a variety of diseases from colds to cancer. **Book Info** (Avery Publishing Group) Author is an independent consultant specializing in marine resources. Provides a clear picture of the immune system and explains what happens when the body gets a cold or autoimmune disorder. Introduces MGN-3, a natural substance shown to strengthen the immune

system's primary defense against tumors, viral and bacterial diseases. For consumers. Softcover.
