when they are false become the foundation for the way we think and act as a society. Thus anytime our approach to parenting is unreliable as it currently is the children we raise in the cloud of our confusion fill our homes and the world with the uncertainty we have taught them. We can't keep using this faulty approach to raising our kids or strive simply to rearrange it. It's critical that we stand back instead, reevaluate what we're doing, and start fresh with a new, more workable plan. Only by fully overhauling our present approach to child-rearing can we start the process of healing our homes and world. To begin, we must investigate how we got off track in the first place and what it takes to right ourselves again.

**A Twofold Problem**

The first error we make in our approach to parenting lies in the faulty notion that the formidable job of child management can be learned by reading a few short books on the subject. In contrast to this odd assumption, we accept the premise that infant and baby care books will be extensive and thorough in their treatment of the importance and methods of nurturing. Yet when the
