"I kept my mouth shut
& no one knew
where I stood"
CHAPTER
& t s quiet in the hallways of power
The security officers monitoring
the closed circuit TV network installed by Ronald Reagan try to look
busy. But now
that the late show has ended
there is nothing to watch
but empty divans
silent photocopiers and dormant push-button phones.
The only visible things hang
from the flames on the wall of the corridor
outside the men's room. Here
thirty-three governors eye one another
from opposite walls
dominating this
portrait gallery are big men who
proudly display ballooning waistcoats in an era
when girth was equated
with prosperity. Although beards dropping to sternums

partially obscure
many Of the Anglo-Saxon fhcesi¼E students of California history
can easily
recognize the memorable leaders.
