Amazon.com 9 Secrets of Women Who Get Everything They Want is like a double shot of espresso with three lumps of sugar. It's more than just inspirational. It's a 194-page, super-charged cattle prod of a self-help book filled with the kind of advice and insight that all busy women could use. White begins the book with "Covet Thy Neighbor's Things," where she suggests that being envious of someone else is a healthy way of determining your own secret desires. What follows is a series of motivational anecdotes combined with practical tips such as, "sweet-talk everyone" and "find TPB (their personal bonus)." She ends with "Rest on Your Laurels," an invitation to enjoy success. White's 9 secrets

are neither mysterious, nor are they eccentric. But they are unconventional. She suggests that the key to getting what you want is thinking "out of the box, " and the best thing about the book is that she offers real success stories from women who've done it. --Mara Friedman From Library Journal Redbook's editor-in-chief on having it all.Copyright 1997 Reed Business Information, Inc.
