Preface  
The BOATING SKILLS AND SEAMANSHIP TEXT is produced by the  
Department of Education of the United States Coast Guard Auxiliary. The course  
for which it is written is recognized as the most comprehensive available today for  
pleasure boaters. Its up-to-date subject material covers essential boating informa-  
tion and regulations for pleasure boaters. It is professionally written for adults in  
simple language and liberally illustrated with pictures and diagrams.  
The text and course are indicative of the resources of the entire Coast Guard  
Auxiliary. Much of its contents reflects the Auxiliary's training experience and  
capabilities in Search and Rescue, Aids to Navigation patrols and our Courtesy  
Marine Examinations. The latter program consists of our checking without  
charge at the owners request equipment on pleasure boats for state and

federal requirements plus other minimum standards. Further the value of the BOATING SKILLS AND SEAMANSHIP TEXT and associated material is greatly enhanced by the assistance of the United States Coast Guard. The course is presented by qualified and certified Auxiliary instructors who voluntarily give their time to share with you their knowledge in boating skills. Many insurance companies discount premiums for their boat insurance to those graduating and holding certificates for this course. Other public education courses are also offered by the Coast Guard Auxiliary. They include BASIC BOATING (3 lessons) SAILING AND SEAMANSHIP (7-12 lessons) COASTAL PILOTING (7-12 lessons) and youth courses. The Department of Education of the Auxiliary and the United States Coast Guard are to be commended for their efforts in providing this service to the pleasure boating public. ~ ~ Chris G. Lagen National Commodore United States Coast Guard Auxiliary
