Jason West has become a political force for his generation. With logic, charm, and conviction, he has used his platform as mayor of New Paltz, New York, to present a radical vision of human rights. This book is his manifesto. West has received the most press for marrying same-sex couples (and is defendant in numerous lawsuits for solemnizing without a license). But he sees the issue of gay marriage in the context of civil rights, basic equality under the law, which he extends to fair housing, property taxes, and energy use.
