INTRODUCTION
> The Truth About
> The Trimble
> Over a quarter-century ago (doesn't that sound historical?) I joined the ranks of science fiction fandom. Activities in this loosely organized collection of enthusiasts were and are only as strenuous as each individual chooses. I wrote for fanzines as well as drew cartoons and serious art for those worthy amateur publications. I attended science fiction conventions and became a member of the Los Angeles Science Fantasy Society. I designed and wore futuristic and fantasy costumes (and won my share of prizes too). In a word, albeit a coined word, I was a science fiction "actifan." During my activity as a science fiction

fani¼ I attended [as do
 all fans in the Los Angeles area] a party hosted by Forrest].
 Ackerman. editor of Famous Monsters of Fdmlond magazine.
 There the fates decreedi¼ some twenty-three years ago¼ that [ohn
 Griffin Trimble and one Betty McCarthy should cross paths. A
 year later we were married and continued in our active \"fanning.\"
 Neither of us did anything which sold professionally in the
 science fiction field¼ but we became Very Well Known in inter-
 national random. About that time¼ I became \"Bjo\"--(Bee-|o).
 By 1966¼ we were a pair of \"actifans\" with one child and
 another soon to be on the way¼ when we saw Star Trek on
 television¼ Iohn and I decided it was worth our attention. We
 continued to watch this science fictional TV series each week¼
 growing more involved with the characterization and (for those
 years) very good SF production values. Both of us hoped that by
 encouraging a long life for Star Trek¼ it would show other
 producers that there was a need for Rood science fiction on
 television.
