corners and in town squares. who addressed the crowds were not educated middle class women who had come to the suffrage movement. experience of factory work and of organizing working class the radical suffragists knew at first hand the harsh environment which the majority of women lived and worked at the end of the nineteenth century and had the courage and determination to do nothing better. They worked closely with the growing movement wanting to change conditions rather than simply to demand and they used their influence to build a movement of women who claimed not only the right to vote but to take part in themselves. I am able to guess how many women were involved in the 20th century
