There are three categories of tax guides. One type gives step-by-step instructions on preparing tax forms and offers tips and suggestions along the way. A second advises financial planning strategy and recommends ways to allocate or invest money in order to minimize taxes. A third counsels the adversarial approach. It is this tack that is taken by CPA Kaplan and specialist Weiss. They portray the IRS as arrogant, uncaring, vindictive, and rife with bureaucratic incompetence. By revealing IRS operating procedures that determine how and when a return is audited, the authors provide tips on minimizing the likelihood of an audit and they spell out "endless" loopholes in our tax laws that they say should be taken advantage of.
