Amazon.com The widely-acclaimed, second edition of the classic #1 small press best-seller on AIDS - and the only book that discusses the relationship between AIDS and cancer, and explores the role of cancer bacteria as a co-factor in the production of fullblown AIDS. Includes chapters on Kaposi's sarcoma, the major AIDS infections, AIDS in children, sex and cancer, viruses and the immune system, and much more. Over 12, 000 copies sold. The Los Angeles Times Book Review Cantwell has done his homework. See all Editorial Reviews
