Just when you thought you would never cry again comes a story so tender and timeless, so remarkably honest and poignant and fresh, that it touches the heart as no novel has done since Love Story.

Sharlie Converse is twenty-six, courageous, beautiful; and it looks as though life may pass her by before it has ever begun. Born with a heart defect that has defeated a battalion of specialists, Sharlie has lived her short years from moment to moment, in all-too-familiar hospital rooms, in the elegant confines of her parents East Side town house, and, in between, in sudden, pain-drenched darknesses. A careful life. A life stamped FRaGmE: DO NOT TOUCH, in which everything that matters most to Sharlie-color and excitement, adventure and romance-is forbidden except in the vivid imaginings and secret longings she has long ago accepted will never be made real. Until, on a crosstown bus crowded with Christmas shoppers, she falls into Brian Morgan's arms. And falls in love
