<p>This is the most complete and up-to-date text available on automotive braking systems for readers who are beyond the entry level. Complete theory information is presented first, followed by general service material that is useable in all repair shops; both portions are well illustrated. Written in a style that is easy to read, the text explains operations thoroughly and clearly. Service and repairs are covered on all levels: preventative maintenance, trouble diagnosis and problem solving, in-vehicle service, and major repair. Stand-alone chapters enable the instructor to present the information in any order. ALSO AVAILABLE INSTRUCTOR SUPPLEMENTS CALL CUSTOMER SUPPORT TO ORDER Instructor's Manual, ISBN: 0-8273-9098-X</p>
