<p>Organized by generic and brand name: authoritative, detailed information on over 4000 medicines. A Brief Description What the medicine is. Its common uses. A special pronunciation guide. Before Using the Medicine Before prescribing any medicine, your doctor needs to know your current health, other drugs you are taking, your medical history, plans for pregnancy, allergies, and a complete description of your symptoms. Proper Use How to use the medicine for maximum effectiveness. The best times to take it. What to do if you miss a dose. Precautions How do drinking, smoking, and eating various foods mix with the drug? Should you avoid the sun? Which medicines make you too drowsy to drive? Side Effects Common and less-common side effects and how to deal with them.</p>
