By uniquely organizing coverage into six domains of personality functioning (biological,

intrapsychic, dispositional, cognitive/experiential, social and cultural, and the

adjustment

domain) Personality Psychology interweaves contemporary research with classic and modern

theories within the context of each of the domains. By adopting this unique framework, authors Randy Larsen and David Buss encourage students to view the "whole person" as the

sum of influences and effects of each of the domains of personality functioning. The newest

and most unique option for a personality course, this text brings the subject to life with a

vivid, colorful layout--the first personality textbook to incorporate a four-color design.
