About the book

Smart Maths for Pre-Primary are packed on the specifications of the pre-primary syllabus requirements. These activity books are ideal for helping children gain support and confidence in learning Maths.

All the exercises are attractively illustrated and have been carefully designed to keep children motivated and excited about learning Maths.

The activities included are specially constructed to suit the different stages of learning Maths whereby children are taught stage by stage according to their level.

For Parents

Smart Maths for Pre-Primary have been designed to encourage a basic understanding of learning Maths. All the exercises are carefully graded to make it easy for your child to learn. Once they understand what is needed, they will enjoy working independently.

More activities are included to cater to the developing mind of young children and prepare them for the Primary School.

This is the Book 3.
