These cats have certainly earned their stripes! Tigers are the largest member of the cat family. In fact, some males grow more than 10 feet long. Tigers can eat 100 pounds of meat in a single day and, like people's fingerprints, no two tigers share the same stripe pattern. Young readers uncover the secrets of this magnificent predator, layer by layer, in "Uncover a Tiger." This extraordinary kit brings together the best elements of a traditional book with an incredible 3-D model. With every turn of the page, readers see

a tiger deconstructed before their eyes. It's a fascinating adventure, filled with wild facts, amazing illustrations, and diagrams that bring this awesome animal to life.
