《外交学经典选读:从柯门斯到瓦泰勒》主要内容：It has become a commonplace to assert that the world of international relations is changing fundamentally. Information and communications technologies have collapsed distance. The revolution in democratic expectations has opened up the foreign policy process to host of new

actors empowered by the importance now attached to wealth. And a single power looms over all the rest, transforming relations of equality into relations of hierarchy.

作者介绍:

目录: Authors Preface and Acknowledgements

Foreword
