This book encompasses a complete collection of projects within the field of landscape architecture, a specialization that is of ever-greater importance, as our societies' awareness and sensitive solutions will allow the professional or the student involved in landscape management to achieve an understanding of this field, with application to a

wide variety of scales and contexts, as well as in different parts of the world. The application to a wide variety of scales and contexts, as well as in different parts of the world. The projects, thoroughly documented and commented by the architects who authored them, offer a wide-angle vision of the diversified strategies implemented in contemporary landscape design construction.
