isbn:9787030235008

《国外数学名著系列(续1)(影印版)57:几何3(曲面理论)》由俄罗斯作家阿诺德编写。The

theory of surfaces in Euclidean spaces is remarkably rich in deep results and applications. This volume of the Encyclopaedia is concerned mainly with the connection between the theory of embedded surfaces and Riemannian geometry and with the geometry of surfaces as influenced by intrinsic metrics.
