出版时间:July 1, 1988

装帧:Paperback

isbn:9780486256689

We know him for finding Livingstone, who wasn't lost, in 1871, but the truly adventurous trip was Stanley's next, in 1874, when the British explorer became one of the first Europeans to run the length of the Congo. His account of that journey reads like some wonderful old boys' adventure tale—except that it's true.
