Beyond their role of reception area, lobbies and waiting rooms present an opportunity for designers to create a dynamic space that reinforces a company's brand and personality. This gloriously illustrated volume covers 45 projects, divided into three categories: Commercial (hotels, day spas, sports centers, senior centers, assisted living facilities) Public (museums, schools, government buildings) Corporate (offices, medical

clinics) Each project contains detailed architectural plans. The book also contains a directory of architects.
