Provocative, personal, and inspirational, *The Green Collar Economy* is not a dire warning but rather a substantive and viable plan for solving the biggest issues facing the country—the failing economy and our devastated environment. From a distance, it appears that these two problems are separate, but when we look closer, the connection becomes unmistakable. In *The Green Collar Economy*, acclaimed activist and political advisor Van Jones delivers a real solution that both rescues our economy and saves the environment. The economy is built on and powered almost exclusively by oil, natural gas, and coal—all fast-diminishing nonrenewable resources. As supplies disappear, the price of energy climbs and nearly everything becomes more expensive. With costs and unemployment soaring, the economy stalls. Not only that, when we burn these fuels, the greenhouse gases they create overheat the atmosphere. As the headlines make clear, total climate chaos looms over us. The bottom line: we cannot continue with business as usual. We cannot drill and burn our way out of these dual dilemmas. Instead, Van Jones illustrates how we can invent and invest our way out of the pollution-based grey economy and into the healthy new green economy. Built by a broad coalition deeply rooted in the lives and struggles of ordinary people, this path has the practical benefit of both cutting energy prices and generating enough work to pull the U.S. economy out of its present death spiral. Rachel Carson's 1963 landmark book *Silent Spring* was the pivotal ecological examination of the last century. Now, rising above the impenetrable debate over the environment and the economy, Van Jones's *The Green Collar Economy* delivers a timely and essential call to action for this new century.

就是感觉这人的办法挺理想化的，但有点我很赞同：1.将政府纳入环保行动的一部分；2.打破生态保护种族隔离。不过他的办法真的太理想化了，通篇对于真正的计划是有限的
