Van Gogh in Focus is a series of books of Vincent van Gogh. Although so much has been written about this extraordinary artist, many questions still need be answered or

have been addressed only in specialist publications. These small, compact books will examine the artist's oeuvre in different contexts throughout the various stages of his life. Each book will focus on unusual viewpoints in Van Gogh's art - such as his remarkable paintings of sunflowers, his passionate correspondence, or his deep love of nature - and will present many new facts and insights. The series is fully illustrated with documents, as well as paintings and drawings by Van Gogh.
