What is the relation between time and change? Does time depend on the mind? Is the present always the same or is it always different? Aristotle tackles these questions in the *Physics*, and *Time for Aristotle* is the first book in English devoted to this discussion. Aristotle claims that time is not a kind of change, but that it is something dependent on change; he defines it as a kind of 'number of change'. Ursula Coope argues that what this means is that time is a kind of order (not, as is commonly supposed, a kind of measure). It is universal order within which all changes are related to each other. This interpretation enables Coope to explain two puzzling claims that Aristotle makes: that the now is like a moving thing, and that time depends for its existence on the mind. Brilliantly lucid in its explanation of this challenging section of the *Physics*, *Time for Aristotle* shows his discussion to be of enduring philosophical interest.

评论

对《物理学》中时间研究部分的解读有一定的启发意义，但是整个来说还是格局太小，只是就事论事，没有看到亚里士多德的时间学说需要更广阔的时间概念来作为支撑。

对亚里士多德时间部分的理解富有启发，想要研究其运动，时间，数等概念，这本书不失为一本好的参考书
