We are all capitalists now. For the first time in human history, the globe is dominated by one economic system. In *Capitalism, Alone*, leading economist Branko Milanovic explains the reasons for this decisive historical shift since the days of feudalism and, later, communism. Surveying the varieties of capitalism, he asks: What are the prospects for a fairer world now that capitalism is the only game in town? His conclusions are sobering, but not fatalistic. Capitalism gets much wrong, but also much right—and it is not going anywhere. Our task is to improve it.

Milanovic argues that capitalism has triumphed because it works. It delivers prosperity and gratifies human desires for autonomy. But it comes with a moral price, pushing us to treat material success as the ultimate goal. And it offers no guarantee of stability. In the West, liberal capitalism creaks under the strains of inequality and capitalist excess. That model now fights for hearts and minds with political capitalism, exemplified by China, which many claim is more efficient, but which is more vulnerable to corruption and, when growth is slow, social unrest. As for the economic problems of the Global South, Milanovic offers a creative, if controversial, plan for large-scale migration. Looking to the future, he dismisses prophets who proclaim some single outcome to be inevitable, whether worldwide prosperity or robot-driven mass unemployment. Capitalism is a risky system. But it is a human system. Our choices, and how clearly we see them, will determine how it serves us.

作者介绍:

Branko Milanovic is Visiting Presidential Professor and Core Faculty at the Stone Center on Socio-Economic Inequality at the Graduate Center, City University of New York. He was formerly Lead Economist in the World Bank's research department. His books include *Global Inequality* (Harvard) and *The Haves and the Have-Nots: A Brief and Idiosyncratic History of Global Inequality*.

评论

First 3 chapters are excellent demonstrating authors expertise in cross country comparisons and international political economy. The remaining two chapters are just tepid and a convolution of armchair sociologist and economist. True, forecasting into the future is difficult, but the author demonstrates weak grasp on the within country inequality

After writing the definitive book on global inequality, Branko returned with a master narrative on the triumph of capitalism, in its dual manifestation -- roughly liberal meritocratic capitalism in the West, and political capitalism in the East. There is much in there that will provoke both progressives and marxists. The last chapter disappoints.

本来是为了经济学部分去看的，没想到讲中国的部分让我学到最多。历史没有改变，是理解变了。推荐。
