Secondary school selection tests, including the still widespread 11 + exam, are used extensively by schools and educational authorities. Oversubscribed schools in particular use them to select pupils. The vast majority of these tests consist of verbal

reasoning, non-verbal reasoning and numerical reasoning questions. This valuable new book from testing expert Mike Bryon contains hundreds of such practice questions and reflects the format, content and level of difficulty of the majority of the tests. It also has guidance notes for parents, detailed explanations that will help parents instruct their children and advice on further reading. An immensely valuable learning tool, it will help any child practice so that they can perform to the best of their abilities.
