Comparative Economic Systems: Culture, Wealth and Power in the 21st Century explains how culture, in various guises, modifies the standard rules of economic engagement, creating systems that differ markedly from those predicted by the theory of general market competition. This analysis is grounded in established principles, but also assumes that individual utility seeking may be culturally determined, that political goals may take precedence over public well being, and that business misconduct may be socially detrimental.

作者介绍:

Steven Rosefielde is a Professor of Economics at the University of North Carolina (with a Ph.D. from Harvard), and a member of the Russian Academy of Natural Sciences.
