装帧:Paperback

isbn:9780632053889

Insect Sampling in Forest Ecosystems highlights the problems faced by entomologists working in forest ecosystems.

Insects play a major part in all aspects of ecology

Brings together the methodology needed to investigate insects through the various strata of the forest canopy

Covers techniques associated with various specialised groups of forest insects

Each chapter is backed up by a sound approach to experimental design and data analysis

Essential reading for advanced students and researchers as well as teachers
