

Web Development with Clojure 3rd Edition

[Web Development with Clojure 3rd Edition_下载链接1](#)

著者:Dmitri Sotnikov

出版者:Pragmatic Bookshelf

出版时间:2020-3-24

装帧:Paperback

isbn:9781680506822

Stop developing web apps with yesterday's tools. Today, developers are increasingly adopting Clojure as a web-development platform. See for yourself what makes Clojure so desirable, as you work hands-on and build a series of web apps of increasing size and scope, culminating in a professional grade web app using all the techniques you've learned along the way.

This fully updated third edition will get you up to speed on the changes in the rapidly evolving Clojure ecosystem — the many new libraries, tools, and best practices. Build a fully featured SPA app with re-frame, a popular front-end framework for ClojureScript supporting a functional style MVC approach for managing the UI state in Single-Page Application-style applications. Gain expertise in the popular Ring/Compojure stack using the Luminus framework. Learn how Clojure works with databases and speeds development of RESTful services. See why ClojureScript is rapidly becoming a popular front-end platform, and use ClojureScript with the popular re-frame library to build single-page applications.

Whether you're already familiar with Clojure or completely new to the language, you'll be able to write web applications with Clojure at a professional level.

作者介绍:

Dmitri Sotnikov is a passionate Clojure developer who enjoys building web applications. He has developed a number of popular Clojure libraries and is the author of the Luminus micro-framework.

Scot Brown is an enthusiastic web developer with a passion for functional programming and open source software.

目录: Introduction

What You Need

Why Clojure?

Why Make Web Apps in Clojure?

Getting Your Feet Wet

Set Up Your Environment

Managing Projects with Leiningen

Build Your First Web App

Refine Your App excerpt

What You've Learned

Luminus Web Stack

Route Requests with Ring

Extend Ring

Define the Routes with Reitit

HTML Templating Using Selmer

What You've Learned

Luminus Architecture

Manage the Project

Think in Terms of Application Components

Managing Stateful Components

What You've Learned

Introducing Clojurescript

Understand ClojureScript

Add ClojureScript Support

Build the UI with Reagent excerpt

Managing State with Re-Frame

What You've Learned

Setting Up for Success

Services

ClojureScript Development Tools

Embracing Re-Frame
Multi-User With Websockets excerpt
Upgrading to Sente
Events and Effects in Re-Frame
What You've Learned
Planning Our Application
Opening (i.e. pitch)
What's in an MVP?
Technical Planning/Architecture
Planning ahead/Architecture Principles (re-title)
What you've learned
Account Management
Authentication
Connecting Posts to Users
Allow users to customize their profile
Likes/Stars
What You've Learned
Advanced Feeds
User Blogs
User Feeds
Post Deletion
Post Boosting
Post Replies
Images/Audio/Markdown (with scaffold for gen. purpose multimedia/format)
Exercises
What you've learned
Deployment
Exercises
Multimedia Posts
Tagged Posts
Comments/Replies/Threading
NOTES
Editor Configuration
Clojure Primer
A Functional Perspective
Data Types
Using Functions
Anonymous Functions
Named Functions
Higher-Order Functions
Closures
Threading Expressions
Being Lazy
Structuring the Code
Deconstructing Data
Namespaces
Dynamic Variables
Polymorphism
What About Global State?
Writing Code That Writes Code for You
The Read-Evaluate-Print Loop
Calling Out to Java
Calling Methods
