Contemporary Climate Change Debates is an innovative new textbook which tackles some of the difficult questions raised by climate change.

For the complex policy challenges surrounding climate migration, adaptation and resilience, structured debates become effective learning devices for students. This book is organised around 15 important questions, and is split into four parts:

What do we need to know?

What should we do?

On what grounds should we base our actions?

Who should be the agents of change?

Each debate is addressed by pairs of one or two leading or emerging academics who present opposing viewpoints. Through this format the book is designed to introduce students of climate change to different arguments prompted by these questions, and also provides a unique opportunity for them to engage in critical thinking and debate amongst themselves. Each chapter concludes with suggestions for further reading and with discussion questions for use in student classes.

Drawing upon the sciences, social sciences and humanities to debate these ethical, cultural, legal, social, economic, technological and political roadblocks, Contemporary Debates on Climate Change is essential reading for all students of climate change, as well as those studying environmental policy and politics and sustainable development more broadly.

作者介绍:

Mike Hulme is Professor of Human Geography at the University of Cambridge, UK, founding director of the Tyndall Centre for Climate Change Research and Editor-in-Chief of the review journal WIREs Climate Change. He is the author of eight books on climate change, including *Why We Disagree About Climate Change* and *Can Science Fix Climate Change?*
