The DSM-5 Alternative Model for Personality Disorders reviews and advances this innovative and increasingly popular scheme for diagnosing and evaluating personality disorders. The authors identify the multiple clinical, theoretical, and research paradigms that co-exist in the Alternative Model for Personality Disorders (AMPD) and show how the model can aid the practicing mental health professional in evaluating and treating patients, as well as show its importance in stimulating research and theoretical understanding of this domain. This work explores and summarizes methods of personality assessment and psychiatric evaluation, research findings, and clinical applications of the AMPD, highlighting its usefulness to clinical teaching and supervision, forensic application, and current research. It is a go-to reference for experienced professionals and researchers, those who wish to learn this new diagnostic system, and for clinicians in training.

#### 作者介绍:

Christopher J. Hopwood is an associate professor of psychology at the University of California, Davis.

Abby L. Mulay is a postdoctoral fellow in clinical forensic psychology at the Medical University of South Carolina, Charleston.

Mark H. Waugh is a staff psychologist at the Oak Ridge National Laboratory, adjunct clinical and teaching faculty at the University of Tennessee, Knoxville, and is in private practice in Oak Ridge, Tennessee.
