IEC61131-3 is the attempt by the industry automation community to unify the

programming language and methodology for PLC. This book offers a through introduction to the PLC itself, the basic idea of programming a PLC for a control process, and the implementation of these general concepts using CODESYS software, which is a widely recognized instance of the IEC61131-3 standard.

作者介绍:

Dag H. Hanssen is a professor with the University of Tromsø.

目录: Part One: Hardware

1 About PLCs

1.1 History

1.2 Structure

1.3 PLC Operation

1.4 Test Problems

2 Digital Signals and Digital Inputs and Outputs

2.1 Introduction

2.2 Terminology

2.3 Switches

2.4 Logical Sensors

2.5 Connection of Logical Sensors

2.6 Properties of Discrete Inputs

2.7 Discrete Actuators

2.8 Test Problems

3 Analog Signals and Analog I/O

3.1 Introduction

3.2 Digitalization of Analog Signals

3.3 Analog Instrumentation

3.4 Temperature Sensors

3.5 Connection

3.6 Properties of Analog Input Modules

3.7 Analog Output Modules and Standard Signal Formats

3.8 Test Problems

Part Two : Methodic

4 Structured Design

4.1 Introduction

4.2 Number Systems

4.3 Digital Logic

4.4 Boolean Design

4.5 Sequential Design

4.6 State-Based Design

4.7 Summary

4.8 Test Problems

Part Three: IEC 61131-3

5 Introduction to Programming and IEC 61131-3

5.1 Introduction

5.2 Brief Presentation of the Languages

5.3 Program Structure in IEC 61131-3

5.4 Program Processing

5.5 Test Problems

6 IEC 61131-3: Common Language Elements

6.1 Introduction

- 6.2 Identifiers, Keywords, and Comments
- 6.3 About Variables and Data Types
- 6.4 Pragmas and Literals
- 6.5 Data Types
- 6.6 Variables
- 6.7 Direct Addressing
- 6.8 Variable versus I/O-Addresses
- 6.9 Declaration of Multielement Variables
- 6.10 Test Problems
- 7 Functions
 - 7.1 Introduction
 - 7.2 On Functions
 - 7.3 Standard Functions
 - 7.4 Boolean Operations
 - 7.5 Arithmetic Functions
 - 7.6 Comparison
 - 7.7 Numerical Operations
 - 7.8 Selection
 - 7.9 Type Conversion
 - 7.10 Bit-String Functions
 - 7.11 Text-String Functions
 - 7.12 Defining New Functions
 - 7.13 EN/ENO
 - 7.14 Test Problems
- 8 Function Blocks
 - 8.1 Introduction
 - 8.2 Declaring and Calling FBs
 - 8.3 FBs for Flank Detection
 - 8.4 Bistable Elements
 - 8.5 Timers
 - 8.6 Counters
 - 8.7 Defining New FBs
 - 8.8 Programs
 - 8.9 Test Problems
- Part Four: Programming
- 9 Ladder Diagram (LD)
 - 9.1 Introduction
 - 9.2 Program Structure
 - 9.3 Boolean Operations
 - 9.4 Rules for Execution
 - 9.5 Use of Standard Functions in LD
 - 9.6 Development and Use of FBs in LD
 - 9.7 Structured Programming in LD
 - 9.8 Summary
 - 9.9 Test Problems
- 10 Function Block Diagram (FBD)
 - 10.1 Introduction
 - 10.2 Program Structure
 - 10.3 Execution Order and Loops
 - 10.4 User-Defined Functions and FBs
 - 10.5 Integer Division
 - 10.6 Sequential Programming with FBD
 - 10.7 Test Problems
- 11 Structured Text (ST)

- 11.1 Introduction
- 11.2 ST in General
- 11.3 Standard Functions and Operators
- 11.4 Calling FBs
- 11.5 IF Statements
- 11.6 CASE Statements
- 11.7 ST Code Based upon State Diagrams
- 11.8 Loops
- 11.9 Example: Defining and Calling Functions
- 11.10 Test Problems
- 12 Sequential Function Chart (SFC)
 - 12.1 Introduction
 - 12.2 Structure and Graphics
 - 12.3 Steps
 - 12.4 Transitions
 - 12.5 Actions
 - 12.6 Control of Diagram Execution
 - 12.7 Good Design Technique
 - 12.8 Test Problems
- Problem 12.5 Mixing Process
- 13 Examples
 - 13.1 Example 1: PID Controller Function Block: Structured Text
 - 13.2 Example 2: Sampling: SFC
 - 13.3 Example 3: Product Control: SFC
 - 13.4 Example 4: Automatic Feeder: ST/SFC/FBD
- Part Five: Implementation
- 14 CODESYS 2.3
 - 14.1 Introduction
 - 14.2 Starting the Program
 - 14.3 Configuring the (WAGO) PLC
 - 14.4 Communications with the PLC
 - 14.5 Libraries
 - 14.6 Defining a POU
 - 14.7 Programming in FBD/LD
 - 14.8 Configuring Tasks
 - 14.9 Downloading and Testing Programs
 - 14.10 Global Variables and Special Data Types
- 15 CODESYS Version 3.5
 - 15.1 Starting a New Project
 - 15.2 Programming and Programming Units (POUs)
 - 15.3 Compiling and Running the Project
 - 15.4 Test Problems
