All too often drama is considered to be either literature or theater. Literature departments take one approach, theater departments the other. Actually, drama incorporates literary and theatrical art. And with this book we hope to encourage the study of drama in relation to both literary and theatrical contexts. Thus we have

devoted the first part of our book to explaining these contexts and the way they interact to produce the unique experience of drama. In the remaining parts of our study, we discuss the modes and elements of drama in terms of the interaction between these contexts.
