Someday someone will write a book that begins with a mother forbidding her child to enter the deep dark woods and ends with that child achieving incredible success without ever setting a toe in the forbidden forest. But not this book. Here, Billy's mom issues a few scary warnings about the woods to her son--"Beware! Beware! The Forest of Sin! None come out, but many go in!"--turns her back for a second, and the next thing you know the devil shows up and whispers something to Bobby about wild strawberries. Blammo! Guess where Billy goes--straight to the forbidden forest, of course. At this point, if you are reading the story aloud to your child, you may think there's a parable on the way. But just when you might expect to run into monsters named Lust, Avarice and Three-Toed Sloth (okay, maybe not Lust), a real monster comes careening along and you realize that this story is just a fairy tale after all--and quite a lovely one at that.

The Minpins taps into the powerful, wonderful child's fantasy of discovering a hidden civilization of tiny folk that accepts and honours him or her. The very best part of this fairy tale is the denouement, where Billy receives the gift of nightly escape on the wings of a swan. One of Roald Dahl's only picture books--with fabulously crosshatched pen-and-ink illustrations by Patrick Benson--The Minpins is superb for reading aloud to

children. And it culminates in a sentence or two of advice that your children just might remember for the rest of their lives. (Ages 3 to 8) --This text refers to an out of print or unavailable edition of this title.
