This revised edition of Applied Economics is about fifty percent larger than the first edition. It now includes a chapter on the economics of immigration and new sections of other chapters on such topics as the “creative” financing of home-buying that led to the current “subprime” mortgage crisis, the economics of organ transplants, and the political and economic incentives that lead to money earmarked for highways being diverted to mass transit and to a general neglect of infrastructure. On these and other topics, its examples are drawn from around the world. Much material in the first edition has been updated and supplemented. The revised and enlarged edition of Applied Economics retains the easy readability of the first edition, even for people with no prior knowledge of economics.

生活在象牙塔和逻辑世界中的索维尔。长句写的非常棒，然并卵。

这个老爷爷常常写四五行不带标点的长句子。
