This brand new title in the definitive Car Design Yearbook series features all the new cars launched worldwide from April 2007 to March 2008. Also included are profiles of the industry's leading designers, a full technical glossary and a list of all the motor

shows in the year ahead. For the seventh yearbook, Stephen Newbury and Tony Lewin consider ‘intelligent’ vehicle-sensing technologies that interact with the driver and the environment, such as collision-avoidance systems, and explore the design methods that India’s Tata Motors has employed to achieve its 100,000 rupee (£1275) Nano car.

- The only annual reference to all the latest trends in car design worldwide
- Over 130 cars, organized A–Z, with key performance and technical data, plus a review of each car’s main stylistic features and innovations
- 550 stunning photographs and original renderings show exterior and interior styling, engine layouts and significant details
